

JAB Series Kits

Each of the AAdynTech Kits includes a professional rugged ATA rated MIL-Spec road case with wheels and handle for easy transport.

All Kits include a JAB fixture, barn door set, gel frame, 15° lens, 30° lens, 55° lens, scrim bag and the road case. Additional kits are available with a user interface digital remote, light bank, and speed ring. Choose the kit that includes everything you need for your production.

JAB Kits are available for the entire JAB series: JAB Daylight, Variable, Tungsten, Hurricane or High Speed versions.

AAdynTech LEDs are exclusively from CREE 

**Brighter. Lighter.
Cleaner. Greener.**

The LED you've been waiting for is here.

DESIGNED, DEVELOPED, ENGINEERED AND ASSEMBLED IN THE USA USING GREEN TECHNOLOGY

Game-changing LEDs for every lighting challenge.

AAdynTech™ has broken new ground for film, television and mobile production professionals. Our Punch and JAB series LED lighting fixtures are the brightest in their class. These revolutionary lights provide flicker free, single-source lighting eliminating multiple shadows while running cool to the touch with low amp draw, resulting in a savings of up to 90% in energy costs.

One of our most exciting new products, the JAB Hurricane, is weatherproof and IP65 Rated. Also new is the Space Light. This high output fixture is as bright as a 6K Space Light and with its multi-channel operation has many versatile applications beyond a traditional Space Light; as a skypan, audience blinder, or for chase and effects lighting.

All of AAdynTech's products are designed, developed, engineered and assembled in the United States by a collaborative engineering team from Sturdy Corp. and CREE.

Our fixtures have been used worldwide for such prestigious recent events as: the London Olympics, U.S. Open Golf and Tennis, Daytime Emmy Awards, Antique Roadshow, Major League Baseball World Series, Major League Baseball All Star Game, World League Soccer, BCS Bowl, Orange Bowl, Rose Bowl, SuperBowl MMXII, and many on-location news broadcasts and feature films.

JAB Daylight

The JAB Daylight is the most powerful compact LED light on the market today. Lightweight, portable, and operates on AC or DC battery power.

- 1854 fc @ 10 feet
- 5600K CTI
- Flicker free-single light source
- No UV or IR emissions
- AC or 28.8v DC battery
- 1.77 amp draw
- 15° / 30° / 55° lenses
- Convection-cooled-runs silent
- Manual, DMX or digital remote control
- Auto-Range voltage 100/277 VAC-50/60Hz
- Patent Pending

The JAB Series is available in five models: Daylight, Tungsten, Variable, Bullet High Speed, and Hurricane to fit your creative requirements without sacrificing output and color-temperature.

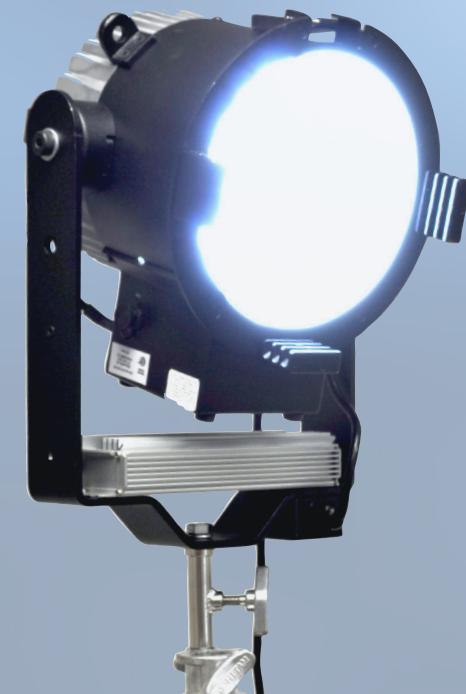

Punch Plus

The Punch Plus redefines lighting for film and studio with built-in programmable lightning, strobe effects, and quick-change lenses for narrow, medium, and wide. All while providing a color-balanced even field with extreme high output.

- 4044 fc @ 10 feet
- Brighter than a 2,500w HMI
- 5600K CTI
- Flicker-free up to 12,000 fps
- No UV or IR emissions
- 4.8 amp draw
- Available in Tungsten
- 15° / 30° / 55° lenses
- DMX or user interface
- Auto-Range voltage 100/277 VAC-50/60Hz
- Patent Pending

The Punch Series is available in four models: Plus, Tungsten, Bullet High Speed and Mega Bullet.

JAB Hurricane

One of AAdynTech's most sought after new fixtures by ENG and field crews the world over, the JAB Hurricane is fully weatherproof, dust-proof, and IP65 rated. The Hurricane may also be DC battery powered.

- IP65 Rated – Outdoor all-weather proof
- 1771 fc @ 10 feet
- 5600K CTI
- Dimmable with no color shift
- Flicker free – single light source
- No UV or IR emissions
- AC or 28.8v DC battery powered
- 1.77 amp draw at full power
- 15° / 30° / 55° lenses
- Manual, DMX (In/Out) or digital remote control
- Auto-Range voltage 100/277 VAC - 50/60Hz
- Patent Pending

Space Light

The Space Light—a truly unique fixture delivers extreme output comparable to conventional 6K Space Lights with all the advantages of energy efficient LED technology. The AAdynTech Space Light has full DMX control with pixel-mapping capability allowing enhanced versatility beyond traditional Space Light applications for use as a skypan, audience blinder or for chase and effects lighting.

- Measured 200 fc @ 12 ft. / 52 fc @ 25 ft.
- 3400K CTI
- 96+ CRI
- Flicker free
- No UV or IR emissions
- 6.8 amp draw at full power
- Convection-cooled – runs silent
- Full DMX / DMX loop thru or UIM digital remote
- DMX setting for (1), (4), (5), (11), (21) channel modes
- Auto-Range Voltage 120/240 VAC - 50/60Hz
- Universal mounts for skirts and targets
- Patent Pending

* Space LEDs 35,000 hours

All AAdyn lights carry a 3-year warranty on the fixture and 60,000* hours on LEDs. All lights are certified UL, ETL, CE, CSA and RoHS compliant, with no measurable emission of UV or IR. All fixtures are supplied with heavy-duty yoke and three lenses at 15°, 30°, 55°.
